This will be our project report page. For Now, this only our instruction page

First Work divider:

We have to code at the same time because everything is interconnected. If one makes a due other's have to keep their work stopped. So better make no dues.

Always **Fetch Origin** before starting the work otherwise you'll not have the updated code. So be carefull.

Work Submission:

Everyone has to submit their work in part (Like you have completed LOGIN.java then Submit it). Submissions should be on GitHub with this process: -

Step 1: Open **GitHub**. You will see an interface with your work file.

Step 2: Uncheck the **mysql-connector-java-8.0.17.jar** file.

Step 3: Write your **Summary** as what you did or on which file you worked.

Step 4: Click on **commit to main** button.

Step 5: Click on **Push Origin**.

Note*: Always be careful before submission. If you have an error contact team member before submit. Do not change other codes. Do exactly what your part wants you to do. Ignore the Design for now.
